

Maksym Petrykin

Professional Experience

10.2025 – 01.2026

Backend Developer / Contractor

“Trood” · Remote

- Development of Python-based backend tools for automation of business and HR processes
- Proof-of-concept integrations with n8n (Python scripts, external APIs)
- Development and securing of REST API endpoints
- API testing and validation of data flows (Pytest)
- Collaboration in a distributed remote team

07.2025 – 10.2025

Backend Developer Intern

“Trood” · Remote

- Design and implementation of REST APIs
- Development of a production-like microservice using Server-Sent Events (SSE)
- Containerization of services using Docker and Docker Compose
- Automated testing with Pytest as part of the development process
- Development of additional backend services (gRPC, Telegram bot, Google TTS integration)

Previous work experience outside of IT (06.2017 – 02.2022)

Personal Information

Address:

09116 Chemnitz, Germany

Date of birth:

24.01.1995 in Kharkiv (Ukraine)

Driver's license:

Classes B, C

Languages

Ukrainian — Native

Russian — Fluent

German — Good written and spoken skills

English — Good written and spoken skills

Contact

Phone:: +49 151 25087468

Education

01.2024 – 10.2025

“Starta Institute” — Python Backend Developer

- Development of web applications with Python, Django, FastAPI
- Working with Docker, Git, SQL/NoSQL, microservices, cloud servers
- Test automation, QA, deployment

04.2025 – 05.2025

“Google Career Certificates (Coursera)”

Online — IT Automation with Python

- Python scripting
- Automation
- Git/GitHub
- Data structures

05.2023 – 10.2024

Professional reorientation and training in software development
including German language studies up to B2 level

06.2016 – 06.2017

NUCPU, Kharkiv — M.A. Extreme Psychology

08.2012 – 07.2017

NANGU, Kharkiv — M.A. Military Translation

Projects

- AutoService Book

Django-based web application for managing vehicle expenses and service history.

Technologies: Django, PostgreSQL, Docker, REST API, Google Authentication

Focus: data modeling, authentication, CRUD logic, clean architecture

GitHub: https://github.com/p95max/AutoService_Book

- JobApply

Web application for structured job application management and job tracking.

Technologies: Django, PostgreSQL, Docker, REST API, Google OAuth

Focus: user authentication (including OAuth), job application management and status tracking, notes and document management, email statistics (microservice), data export, role-based logic

GitHub: <https://github.com/p95max/JobApply>

- ChattyM

Minimalist social network.

Technologies: Django 5, PostgreSQL, Bootstrap 5

Focus: email authentication, profiles, posts, comments, likes, subscriptions, notifications, REST API

GitHub: <https://github.com/p95max/ChattyM>

- What2Cook

Lightweight recipe finder based on user input.

Technologies: FastAPI, Async SQLAlchemy, PostgreSQL, Jinja2

Focus: asynchronous APIs, database queries, lightweight frontend

GitHub: <https://github.com/p95max/What2Cook>

Additional projects:

<https://myportfoliospa-1.onrender.com>

GitHub:

<https://github.com/p95max/>

Skills

Sprachen: Python

Frameworks: Django, FastAPI

Frontend basics : HTML, CSS, Bootstrap, JS

APIs: REST, gRPC

Databases: PostgreSQL, SQLite

Version control & CI/CD: Git, GitHub, GitHub Actions (CI/CD)

Automation: API-Integrationen, Web Scraping, Daten-Parsing

Cloud & integrations: Google Drive API, OAuth 2.0, Webhooks

DevOps: Docker, Terraform, Azure, Nginx

Testing: Pytest, Unit Tests

Operating systems: Linux (Ubuntu), Windows

Interests

Computer hardware (PC building),
Automotive technology,
Travel.
