

Maksym Petrykin

ABOUT ME

Motivated backend developer with a focus on Python, Django, and modern web technologies. I have practical experience in the development of microservices, REST APIs, and Docker-based solutions. Passionate about automation, AI applications, and clean code architecture. Looking for new challenges in an innovative team.

Professional experience

Rizq Launcher (Trood) 10.2025 – present

Remote – Backend Contractor (revenue-share)

- Development of AI tools for business automation (e.g. HR tools)
- n8n integration and PoC development with Python scripts
- API Testing

Trood 07.2025 – 10.2025

Remote – Backend Developer Intern

- Contributing to microservices (gRPC, Docker Compose)
- Developing tools for AI agents

NGU 07.2017 – 10.2021

Serviceman

Projects

AutoService Book

AutoService Book: **Django** Web app for managing vehicle costs and service history, including REST API and Google Auth.

https://github.com/p95max/AutoService_Book

ChattyM

ChattyM is a minimal social network built with **Django 5**, PostgreSQL, and Bootstrap 5. It demonstrates core web app patterns: email-based auth, profiles, posts, comments, likes, subscriptions, private messaging, notifications, and a small REST API.

<https://github.com/p95max/ChattyM>

What2Cook

What2Cook — lightweight recipe finder: give it the ingredients you have and it will suggest recipes. Built with **FastAPI**, async SQLAlchemy, Postgres, Jinja2 templates and a small, responsive frontend.

<https://github.com/p95max/What2Cook>

PERSONAL INFORMATION

Address: Michaelstr. 70

09116 Chemnitz Deutschland

Hard Skills

Core competencies

Python, Django, REST API, PostgreSQL, Docker

Web development

FastAPI, HTML5, CSS3, JavaScript, Bootstrap

DevOps & Deployment

Docker Compose, Nginx, Git, GitHub, Linux

Testing & Quality

Unit Testing, Pytest, QA, Test Automation

Modern Technologies

gRPC, Microservices, Cloud Applications, LLM, AI, n8n

Authentication & Integration

Allauth, SQLite, MySQL

Education

Starta Institute, Online – Python Backend Developer

December 2024 – October 2025

Development of web applications with Python, Django, FastAPI

Working with Docker, Git, SQL/NoSQL, microservices, cloud servers

Test automation, QA, deployment

Google Career Certificates (Coursera), Online – IT Automation with Python

April 2025

Python scripting, automation, Git/GitHub, data structures, capstone project

<https://www.coursera.org/account/accomplishments/verify/HBXFY1UQN84>

NANGU, Kharkiv – Military Translation Specialist (Master's)

August 2012 – May 2017

NUCPU, Kharkiv – Extreme Psychology Specialist (Master's)

June 2016 – July 2017

Languages

English (B2),

German (B2),
